Attendance Letters for Consecutive Absences

The current logic for Attendance letters Configuration does not allow for the creation of attendance letters to count consecutive absences. There isn't a way to trick the system into counting consecutive absences therefore we are asking Skyward to please consider this option for Attendance Letters.

We attempted other options such as the Absence Occurrence/Consecutive Absence Feature but learned it does not work as it is based off the Calendar Configuration and cannot pull only students with Consecutive absences. We also explored Student Thresholds in the Student Module but learned that it was pulling student records that didn't make sense based on the criteria set.

We have a school district that is hoping to be able to create consecutive absences letters and feel this would be a beneficial implementation for all School Districts. Please consider implementing this idea.

Student Lists

- Select Base View from District Views
- Delete Birth Date Column
- Add MLL Column
- Save View
- Add Primary Guardian Name and Phone #
- Save View
- Add Attendance Columns

Reports

- My Report Queue
- Attendance Summary by Student
- Percent Attended by Student
- Attendance Roster
